

Speaker Introduction for K. J. Janssen

It is my pleasure to introduce one of the countries up-and-coming spiritual writers.
K. J. Janssen

He has been writing fiction since he was eight, but it wasn't until he retired, several years back, that he took up writing as a profession. His first two novels, *Blood Money* and *Fatal Dose*, featured a tough FBI Special Agent with a bunch of bad guys to track down and a host of love interests to spice up his life.

From there, Ken moved to his first drama, with the novel *Family Matters* about a family that ran roughshod over their townsfolk until one of them hired an assassin to kill the family and burn their Mansion to the ground.

Continuing with the drama genre, he next penned *Siblings* in which the Symington family, though a well-respected family on the outside, live lives that include adultery, drug trips and illegal abortions, in this exciting thriller about family life in a small New England town.

It was at this point in his literary career that Ken decided to turn to spiritual works that would mirror his life and beliefs. *The Journey*, a New Thought novel is his first such novel and it has risen to the top of the sales charts for multiple genres.

His lifetime of living New Thought principles spans over fifty years and makes him a voice worth listening to. Let's give a big hand to the author of *The Journey*, K. J. Janssen
